

Your clinical solutions Accelerator

VisionIT infrastructure enables a rapid conversion of your knowledge into proven, state-of-the-art .NET, web based solutions

- ▼ Increase revenues and profitability
- ▼ Cut-down selling cycles
- ▼ Speed up customized solutions implementation
- ▼ Dramatically improve customer satisfaction
- ▼ Accelerate solutions time-to-market

The VisionIT implementation Infrastructure

Your Value

VisionIT enables healthcare IS integrators, consultants and IS vendors to focus on their solutions – instead of wrestling with the software and system processes

VisionIT is a unique web-based rapid implementation infrastructure, enabling a programming-free creation and management of complex clinically based solutions

VisionIT proprietary core technology enables programming-free rendering of dynamic XML based user-interface elements with object-oriented dynamic entities over a standard MS-SQL server at Microsoft's .net environment

VisionIT infrastructure represents years of knowledge, experience and solutions provided to clinicians and the healthcare industry

VisionIT is an OEM product, fully applicable for your corporate branding

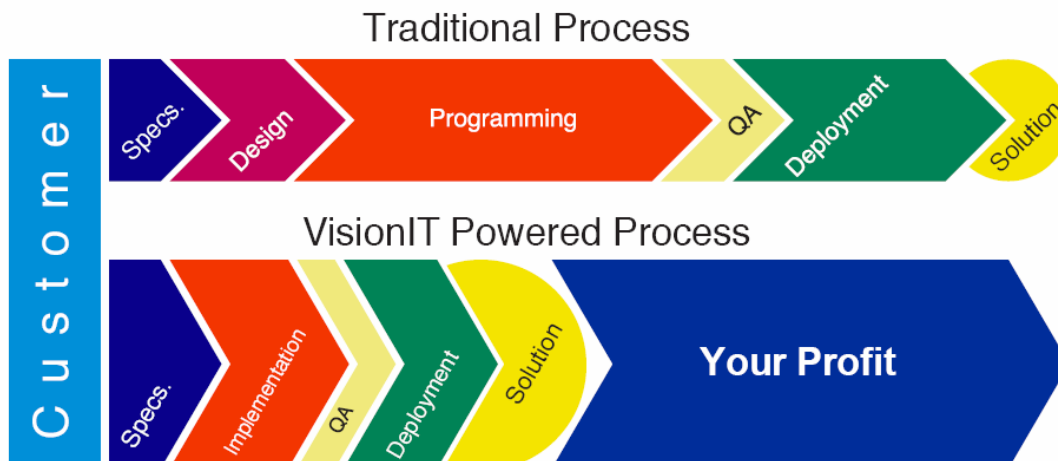

VisionIT actively drives proven solutions such as:

-  **EMR / HER**
-  **CPOE**
-  **Telemedicine**
-  **Document & Image capture & management**
-  **Clinical Workflow and Rules-Based applications**
-  **Multimedia Clinical reporting**
-  **Patient/Provider Portals**
-  **Clinical Data Capture**

On-The-Fly Applications Generators

- Uniquely designed for healthcare!

- ▼ Web-Based system infrastructure engine - Managing users, permissions, specialties, locations, procedures, groups, departments, configurations and much more
- ▼ Data Entry screens engine- Data capture fields and screens are created and database linked in any hierarchical level of data items and pages
- ▼ Data Presentation / Documentation engine - Generates and manages any number of customized presentation screens and documents
- ▼ Rule based engine - Enable the generation of complex rules, alerts and actions
- ▼ Reporting engine - Comprehensive reporting of any clinical scenario and linkage to dynamic presentation entities and customized distribution
- ▼ Imaging and Multimedia - Capture and integration engine for fast connectivity, database integration and management of external imaging sources; Video, DICOM, Monitoring, Audio and more
- ▼ PDF server – An organizational central server automatically converts, manages and distributes PDF files
- ▼ Connectivity engine - XML based, converts data and manages connectivity with any external and legacy data source, using sophisticated technologies and fully supports HL7

How can VisionIT assist you with your customers?
